Foreword. ................................................................. xvi

Preface. ............................................................... xix

1. Building Web Apps with WordPress. ................................. 1
   What Is a Website? .................................................... 1
   What Is an App? ..................................................... 1
   What Is a Web App? .................................................. 1
      Features of a Web App ........................................... 2
      Mobile Apps ....................................................... 3
      Progressive Web Apps .......................................... 4
   Why Use WordPress? ................................................ 5
      You Are Already Using WordPress .......................... 5
      Content Management Is Easy with WordPress .......... 5
      User Management Is Easy and Secure with WordPress .. 6
      Plugins ............................................................. 6
      Flexibility Is Important ....................................... 6
      Frequent Security Updates .................................... 7
      Cost ................................................................. 7
      Responses to Some Common Criticisms of WordPress .... 8
   When Not to Use WordPress ..................................... 11
      You Plan to License or Sell Your Site’s Technology ... 11
      Another Platform Will Get You “There” Faster .......... 11
      Flexibility Is Not Important to You ....................... 12
      Your App Needs to Be Highly Real Time .................. 12
   WordPress as an Application Framework ....................... 13
      WordPress Versus Model-View-Controller Frameworks ... 13
      Anatomy of a WordPress App .................................. 16
What Is SchoolPress? 16
SchoolPress Runs on a WordPress Multisite Network 16
The SchoolPress Business Model 17
Membership Levels and User Roles 17
Classes Are BuddyPress Groups 17
Assignments Are a CPT 18
Submissions Are a (Sub)CPT for Assignments 18
Semesters Are a Taxonomy on the Class CPT 18
Departments Are a Taxonomy on the Class CPT 18
SchoolPress Has One Main Custom Plugin 18
SchoolPress Uses a Few Other Custom Plugins 19
SchoolPress Uses the Memberlite Theme 20

</table>
Defining and Registering CPTs
register_post_type( $post_type, $args );

What Is a Taxonomy and How Should I Use It?
Taxonomies Versus Post Meta
Creating Custom Taxonomies
register_taxonomy( $taxonomy, $object_type, $args )
register_taxonomy_for_object_type( $taxonomy, $object_type )

Using CPTs and Taxonomies in Your Themes and Plugins
The Theme Archive and Single Template Files
Good Old WP_Query and get_posts()
Metadata with CPTs
add_meta_box( $id, $title, $callback, $screen, $context, $priority,
    $callback_args )
Using Meta Boxes with the Block Editor
Custom Wrapper Classes for CPTs
Extending WP_Post Versus Wrapping It
Why Use Wrapper Classes?
Keep Your CPTs and Taxonomies Together
Keep It in the Wrapper Class
Wrapper Classes Read Better

6. Users, Roles, and Capabilities ........................................... 173
   Getting User Data
   Add, Update, and Delete Users
   Hooks and Filters
   What Are Roles and Capabilities?
       Checking a User's Role and Capabilities
       Creating Custom Roles and Capabilities
   Extending the WP_User Class
   Adding Registration and Profile Fields
   Customizing the Users Table in the Dashboard
   Plugins
       Theme My Login
       Hide the Admin Bar from Nonadministrators
       Paid Memberships Pro
       PMPro Register Helper
       Members
       WP User Fields

7. Working with WordPress APIs, Objects, and Helper Functions .............. 195
   Shortcode API
   Shortcode Attributes
8. Secure WordPress. .......................................................... 237
   Why It's Important 237
   Security Basics 238
      Update Frequently 238
      Don't Use the Username “admin” 238
      Use a Strong Password 239
      Examples of Bad Passwords 239
      Examples of Good Passwords 240
   Hardening WordPress 240
      Don't Allow Admins to Edit Plugins or Themes 240
Change Default Database Tables Prefix
Move wp-config.php
Hide Login Error Messages
Hide Your WordPress Version
Don't Allow Logins via wp-login.php
Add Custom .htaccess Rules for Locking Down wp-admin
SSL Certificates and HTTPS
  Installing an SSL Certificate on Your Server
  WordPress Login and WordPress Administrator over SSL
  Debugging HTTPS Issues
  Avoiding SSL Errors with the “Nuclear Option”
Back Up Everything!
Scan, Scan, Scan!
Useful Security Plugins
  Spam-Blocking Plugins
  Backup Plugins
  Firewall/Scanner Plugins
  Login and Password-Protection Plugins
Writing Secure Code
  Check User Capabilities
  Custom SQL Statements
  Data Validation, Sanitization, and Escaping
  Nonces

9. JavaScript Frameworks and Workflow .......................................................... 269
What Is ECMAScript?
What Is ES6?
What Is ES9?
What Is ESNext?
What Is Ajax?
What Is JSON?
jQuery and WordPress
  Enqueuing Other JavaScript Libraries
  Where to Put Your Custom JavaScript
Ajax Calls with WordPress and jQuery
Managing Multiple Ajax Requests
Heartbeat API
WordPress Limitations with Asynchronous Processing
JavaScript Frameworks
  Backbone.js
  React
## 10. WordPress REST API

What Is a REST API? 291
API 292
REST 292
JSON 292
HTTP 293

Why Use the WordPress REST API? 296

Using the WordPress REST API V2 297
Discovery 297
Authentication 298
Routes and Endpoints 303
Requests 304
Responses 306

Adding Your Own Routes and Endpoints 307

register_rest_route( $namespace, $route, $args, $override ); 308

Setting Up the WordPress Single Sign-On Plugin 308

Adding the /wp-sso/v1/check Route 309

Bundling Basic Authentication with Our Plugin 310

Using the Endpoint We Set Up to Check User Credentials 311

Popular Plugins Using the WordPress REST API 312
WooCommerce 312
BuddyPress 314
Paid Memberships Pro 315

## 11. Project Gutenberg, Blocks, and Custom Block Types

The WordPress Editor 320
The Classic Editor Plugin 321

Using Blocks for Content and Design 321
Using Blocks for Functionality 321
Creating Your Own Blocks 322

Minimal Block Example 322

Using Custom Blocks to Build App Experiences 324

Enabling the Block Editor in Your CPTs 324
Block Categories 325

The Homework Blocks 326
Limiting Blocks to Specific CPTs 326
Limiting CPTs to Specific Blocks 326
Block Templates 327

Saving Block Data to Post Meta 329

Tips 330
Enable WP_SCRIPT_DEBUG 330
Use filemtime() for the Script Version 330
12. **WordPress Multisite Networks**

Why Multisite?

Why Not Multisite?

Multisite Alternatives

Multiple Authors or Categories on the Same WordPress Site

Custom Post Types

Totally Separate Sites

Use a WordPress Maintenance Service

Multitenancy

Setting Up a Multisite Network

Managing a Multisite Network

Dashboard

Sites

Users

NS Cloner: Site Copier

WP Multi Network

Basic Multisite Functionality

$blog_id

is_multisite()

get_current_blog_id()

switch_to_blog( $new_blog )

restore_current_blog()
get_blog_details( $fields = null, $get_all = true )
update_blog_details( $blog_id, $details = array() )
get_blog_status( $id, $pref )
update_blog_status( $blog_id, $pref, $value )
get_blog_option( $id, $option, $default = false )
update_blog_option( $id, $option, $value )
delete_blog_option( $id, $option )
get_blog_post( $blog_id, $post_id )
add_user_to_blog( $blog_id, $user_id, $role )
wpmu_delete_user( $user_id )
create_empty_blog( $domain, $path, $weblog_title, $site_id = 1 )

Functions We Didn’t Mention

13. Localizing WordPress Apps. ............................................................. 359
   Do You Even Need to Localize Your App?
   How Localization Is Done in WordPress
   Defining Your Locale in WordPress
   Text Domains
      Setting the Text Domain
   Prepping Your Strings with Translation Functions
      __( $text, $domain = “default” )
      _e( $text, $domain = “default” )
      _x( $text, $context, $domain = “default” )
      _ex( $title, $context, $domain = “default” )
   Escaping and Translating at the Same Time
   Creating and Loading Translation Files
      Our File Structure for Localization
      Generating a .pot File
      Creating a .po File
      Creating a .mo File
   GlotPress
      Using GlotPress for Your WordPress.org Plugins and Themes
      Creating Your Own GlotPress Server

   Terms
   Origin Versus Edge
   Testing
      What to Test
      Chrome Debug Bar
   The WordPress Site Health Tool
   Apache Bench
