Contents

Chapter 1 – Introduction to Control Systems		
Article No.	Article	Page No.
1.1	The Importance of Automation and Centralized Control Onboard Ships	1
1.2	Factors for Development of Automatic Control	5
1.2.1	- Safety	5
1.2.2	- Downsized Manpower	5
1.2.3	- The Human Element	5
1.2.4	- Cost of Fuel and Operation Efficiency	5
1.2.5	- Failsafe Policies	6
1.2.5.1	- Failure Analysis	6
1.2.6	- Redundancy	7
1.3	Control Media	7
1.3.1	- Advantages of a Pneumatic System on a Ship	7
1.3.2	- Advantages of an Electronic System on a Ship	8
1.3.3	- Future Aspects	8
1.4	Process Control System	9
1.4.1	- Elements of a Control System	9
1.4.2	- Open Loop System	10
1.4.3	- Closed Loop System	11
1.4.4	- Feed-back in a Control System	13
1.4.4.1	- Negative Feed-back	14
1.5	Transfer Function of a Control System	15
1.5.1	- Definition of a Transfer Function	15
1.5.2	- Methods of Obtaining a Transfer Function	16
1.5.3	- Poles and Zeros of a Transfer Function	16
1.5.4	- Concept of a Transfer Function	17
1.5.5	- Example of the Transfer Function of a Network	20
1.5.6	- The Effect of an Impulse Signal	21
1.5.7	- Solved Examples for Transfer Functions	21

Contents

Chapter 2 – Measuring Sensors		
Article No.	Article	Page No.
2.1	Introduction	27
2.1.1	- Sensor and Transmitter	27
2.1.2	- Sensor Classification	28
2.1.3	- Transducers	29
2.1.4	- Signal Type	29
2.1.5	- Transmission System Dynamics	29
2.2	Temperature Measurement	30
2.2.1	- Mechanical Temperature Measuring Devices	31
2.2.1.1	- Principle of Operation	31
2.2.1.2	- Liquid-in-glass Thermometer	32
2.2.1.3	- Bimetallic Strip Thermometer	32
2.2.2	- Resistance Temperature Detectors (RTDs)	33
2.2.3	- Platinum Resistance Temperature Detector Pt 100	33
2.2.3.1	- RTD Construction	35
2.2.3.2	- Temperature Detection Circuitry	37
2.2.3.3	- Three-wire Measurement	38
2.2.4	- Thermistors	40
2.2.5	- Thermocouples	41
2.2.5.1	- Principle of Operation	41
2.2.6	- Thermopile	45
2.2.7	- P-N Junctions	45
2.2.8	- Characteristics of Various Types of Temperature Sensors	46
2.2.9	- Infrared Temperature Sensors	46
2.3	Pressure Measurement	47
2.3.1	- Working of a Pressure Switch	47
2.3.2	- Conversion from Mechanical Input to Electrical Output	48
2.3.3	- Piezoelectric Transducers	50
2.3.4	- Linear Variable Differential Transformers	51

Contents

Chapter 2 – Measuring Sensors		
Article No.	Article	Page No.
2.3.5	- Capacitive Pressure Sensors	53
2.3.6	- Variable Capacitance Transducer	55
2.4	Level Measurement	57
2.4.1	- Electrical Methods	58
2.4.2	- Hydrostatic Pressure Methods	58
2.4.3	- Dip Tube Methods	58
2.4.4	- Resistance Tape Level Measurement	60
2.4.5	- Conductivity Probe Method	60
2.4.6.	- Gauge Glass	61
2.4.7	- Hydrostatic Head Level Sensors	63
2.4.8	- Differential Pressure Transmitters for Boiler Water Level Measurement	63
2.4.8.1	- Level Compensation	65
2.4.8.1.1	- Zero Suppression	66
2.4.8.1.2	- Zero Elevation	66
2.4.9	- Capacitance Level Sensor	68
2.4.9.1	- Measurement of Electrically Non-Conductive Materials	70
2.4.9.1.1	- Proximity (Non-contacting) Measurements	70
2.4.10	- Ultrasonic Liquid Level Sensor	73
2.4.10.1	- Working Principle of an Ultrasonic Level Sensor	73
2.4.11	- Tank Radar System	73
2.4.11.1	- The Radar Level Measurement Principle	73
2.4.11.2	- Pulse Radar Level Transmitters	75
2.5	Flow Measurement	77
2.5.1	- Rotameter	77
2.5.2	- Orifice Flow Meter	78
2.5.2.1	- Types of Orifice Plates	81
2.5.3	- Venturi Flow Meter	82

Contents

Chapter 2 – Measuring Sensors		
Article No.	Article	Page No.
2.5.4	- Turbine Flow Meter (Mechanical)	83
2.5.5	- Turbine Flow Meter (Electrical)	84
2.5.6	- Electromagnetic Flow Meter	85
2.5.7	- Ultrasonic Flow Meter	86
2.5.8	- Doppler Flow Meter	87
2.5.8.1	- Theory of the Doppler Effect Ultrasonic Flow Meter	88
2.6	Variable Inductance Transducers	89
2.6.1	- Electromagnetic Type Transducer	90
2.6.2	- Electro-dynamic Type Transducer	90
2.7	Square Root Extractor	91
2.8	Smart Transmitters	93
2.8.1	- Smart Transmitter Operation	94
2.8.2	- Automatic Self-Calibration	95
2.8.3	- Failsafe Mode	95

Chapter 3 – Signal Transmitting Devices		
Article No.	Article	Page No.
3.1	Introduction	97
3.2	Working Principle of the Nozzle-flapper	99
3.3	Nozzle-flapper with Negative Feedback	101
3.4	Electro-Pneumatic (I/P) Converter	105
3.4.1	- Force-balance Type of I/P Converter	106
3.5	Moment-balance Mechanism	107
3.6	True Force Balance (Stack) Mechanism	108
3.7	Air Relay (Pneumatic Amplifier)	110
3.7.1	- Continuous Bleed-type Pneumatic Relay	111
3.7.2	- Non-bleed-type Pneumatic Relay	111
3.8	Motion-balance Device	112
3.9	Synchros	113

Contents

Chapter 3 – Signal Transmitting Devices

Article No.	Article	Page No.
3.9.1	- Synchros for Rudder Angle and Course Indication	113

Chapter 4 – Control Systems

Article No.	Article	Page No.
4.1	Modes of Control	115
4.1.1	- Discrete Controllers	115
4.1.1.1	- Applications of On-Off Control	116
4.1.1.2	- Advantages of On-Off Control	116
4.1.1.3	- Major Disadvantage of On-Off Control	116
4.1.1.4	- Step Control	117
4.1.2	- Continuous Control	117
4.2	Linear Control System	118
4.2.1	- Example of a Linear Control System	118
4.3	Non-linear Control System	119
4.3.1	- Example of a Non-linear System	119
4.4	Analog or Continuous System	119
4.5	Digital System	119
4.6	Single Input Single Output System	120
4.7	Multiple Input Multiple Output System	120
4.8	Lumped Parameter System	120
4.9	Distributed Parameter System	120
4.10	Sources of Disturbances or Load Change	121
4.11	Hysteresis	121
4.12	System Response	122
4.12.1	- Distance Velocity Lag	122
4.12.2	- Measurement Lag	122
4.12.3	- Transfer Lag	122
4.13	Stability of Automatic Control Systems	123

Contents

Chapter 4 – Control Systems		
Article No.	Article	Page No.
4.13.1	- Step Response	125
4.14	Time Constant	127
4.15	Proportional Control	128
4.15.1	- Controller Sensitivity or 'Gain'	131
4.15.2	- Limits of Proportional Action	132
4.16	Integral Control	132
4.16.1	- Integral Action Time (IAT)	134
4.17	Rate or Derivative Control	138
4.18	P + I + D Control	140
4.19	Pneumatic Controller	143
4.19.1	- Pneumatic Proportional Controller	143
4.19.2	- Example of Proportional and Integral Control	145
4.20	Pneumatic PID Controller	146
4.20.1	- Adjustment for Operations	150
4.20.2	- Tuning the Controller	151
4.20.3	- Maintenance of the Controller	151
4.21	Stacked Type Controller	152
4.21.1	- Desired Value	152
4.21.2	- Proportional Control	152
4.22	Types of Control Systems	155
4.22.1	- Feed-forward Control	155
4.22.2	- Feed-forward Plus Feed-back Control	155
4.22.3	- Split Range Control	157
4.22.4	- Cascade Control	158
4.22.5	- Ratio Control	159
4.22.6	- Digital Control	160
4.22.7	- Fuzzy Control	161
4.22.8	- Selective Control	162

Contents

Chapter 5 – Correcting Units		
Article No.	Article	Page No.
5.1	Correcting Unit or Final Control Element	163
5.2	The Actuator	163
5.3	Valve Actuators	163
5.4	Types of Valve Actuators	164
5.4.1	- Linear Valve Actuators	164
5.4.2	- Pneumatic Actuators	164
5.4.3	- Electric Actuators	165
5.4.3.1	- Linear Electric Actuator	165
5.4.3.2	- Rotary Electric Actuator	166
5.4.4	- Hydraulic Actuators	167
5.4.4.1	- Double Acting Actuator	167
5.4.4.2	- Electro-hydraulic Valve Actuators	168
5.4.4.3	- Rotary Hydraulic Valve Actuators	170
5.5	Solenoid Valve	170
5.5.1	- Basic Circuit Functions of Solenoid Valves	171
5.5.2	- Types of Operation	171
5.5.2.1	- Direct-operated	171
5.5.2.2	- Indirectly-operated (servo or pilot operated)	172
5.6	Diaphragm-type Pneumatic Operated Control Valves	173
5.6.1	- Direct-acting Actuator (Spring-to-retract)	174
5.6.2	- Reverse-acting (Spring-to-extend)	176
5.7	Valve Positioners	177
5.7.1	- The Second Stage Amplifier or “Booster Relay”	179
5.7.2	- Electro-pneumatic Force Balance Positioner	181
5.7.3	- Digital Valve Positioner	183

Contents

Chapter 6 – Manipulating Elements		
Article No.	Article	Page No.
6.1	Servomechanism	187
6.1.1	- Position Control	188
6.1.1.1	- Full Follow-up (Manual) Control of a Rudder	188
6.1.1.2	- Alternate Electrohydraulic Servomechanisms for Steering Systems	189
6.1.2	- Speed Control	190
6.2	Servomotor	190
6.2.1	- Types of Electric Servo Motors	190
6.2.2	- DC Servo Motor	191
6.2.3	- AC 2-phase Servo Motor	191
6.2.4	- AC 3-Phase Servo Motor	192
6.3	Hydraulic Servo Valve	194
6.3.1	- Principle of Working	196

Chapter 7 – Application of Control on Ships		
Article No.	Article	Page No.
7.1	Introduction	199
7.2	Interpretation of the Mandatory Requirements for UMS Ships	199
7.2.1	- Control of Propulsion Equipment from the Bridge	199
7.2.2	- Centralized Control	199
7.2.3	- Automatic Fire Detection and Alarm System	199
7.2.4	- Comprehensive Machinery Alarm System	200
7.2.5	- A Fire Control Station	200
7.2.6	- Automatic High Bilge Level Alarms and Pumping Systems	200
7.2.7	- Automatically Started Emergency Generator for Essential Services	200
7.2.8	- Local (Manual) Control of Essential Services	200
7.2.9	- Automatic Control System for the Boiler	201
7.2.10	- Safety Systems	201

Contents

Chapter 7 – Application of Control on Ships		
Article No.	Article	Page No.
7.2.11	- Regular Testing and Maintenance of Instrumentation / Monitoring Systems	202
7.3	Boiler Automatic Combustion Control	202
7.3.1	- Turn-down Ratio	204
7.3.2	- Boiler Safeties	204
7.4	Boiler Air / Fuel Ratio Control	206
7.4.1	- Too Little Air Increases Pollution and Wastes Fuel	207
7.4.2	- Too Much Air Wastes Fuel	207
7.5	Boiler Water Level Control	208
7.6	Steam Temperature Control	210
7.7	Measurement of Viscosity and its Control	211
7.7.1	- Viscosity Sensor (Viscometer)	212
7.7.2	- Viscotherm and Viscosity Controller	213
7.7.3	- Fork-type Viscometer	215
7.7.4	- Principle of Operation	215
7.8	Fuel Oil Temperature Control	217
7.9	Lubricating Oil Temperature Control	217
7.10	Jacket Cooling Water Temperature Control (Cascade Control)	219
7.11	Piston Cooling Water Temperature Control	220
7.12	Scavenge Air Control	221
7.12.1	- Scavenge Air Temperature Control	221
7.12.2	- Scavenge Air Pressure Control	222
7.13	Main Engine Starting Air Control	223
7.14	The Electronic Governor and its Components	225
7.14.1	- The Magnetic Speed Pickup (MPU)	226
7.14.2	- The Electronic Speed Relay	227
7.14.3	- Representation of the Electronic Fuel Control Cycle	228
7.14.4	- The Electronic Governor Controller	229

Contents

Chapter 8 – Miscellaneous Instruments		
Article No.	Article	Page No.
8.1	Introduction	231
8.2	Monitoring of Water Purity	231
8.2.1	- The Dionic Water Purity Meter	231
8.2.2	- The Salinometer	232
8.3	Oily Water Separator	235
8.3.1	- Comparison of OCM Technologies	236
8.4	Flame Eye	237
8.5	Crankcase Oil Mist Detector	238
8.5.1	- Crankcase Explosions	239
8.5.2	- The Comparison-type Crankcase Oil Mist Detector	239
8.6	Reference-beam Vibrometers	241
8.7	Proximity Sensors	242
8.7.1	- Capacitive Proximity Sensors	245
8.8	Incremental Position Encoder	247
8.9	Torque and its Measurement	250
8.9.1	- Principle of Measurement	250
8.9.2	- Proximity Torque Sensor	250
8.9.3	- Power Calculation	251
8.9.4	- Torsion Detector Ring	251
8.10	The Combustible Gas Indicator (CGI) or Explosimeter	254
8.10.1	- Application	254
8.10.2	- Principle of Operation	254
8.11	The Tankscope	256
8.11.1	- Principle of Operation	256
8.12	Oxygen Analyser	258
8.12.1	- The Need for Oxygen Analysis	258
8.12.2	- Paramagnetic Oxygen Analysis	258
8.12.2.1	- Principle of Operation	258
8.12.2.2	- Construction	258

Contents

Chapter 8 – Miscellaneous Instruments		
Article No.	Article	Page No.
8.12.3	- Zirconia Oxygen Analysis	260
8.13	Fire Alarm and Detection System	261
8.13.1	- Heat Detector - Rate of Rise Type	261
8.14	Combustion Detector	262
8.14.1	- Operation of Smoke Detectors	262
8.15	Detectors Reacting to Radiation Emanating from Flames	265

Chapter 9 – Terms and Definitions		
Article No.	Article	Page No.
9.1	Terms associated with a Control System	267
9.1.1	- System	267
9.1.2	- Controller	267
9.1.3	- Reference Point or Set Point	267
9.1.4	- Controlled Output or Controlled Variable	268
9.1.5	- Feed-back Signal	268
9.1.6	- Actuating Signal or Error Signal	268
9.1.7	- Manipulated Variable	268
9.1.8	- Deviation	268
9.1.9	- Set Point	268
9.1.10	- Offset	268
9.1.11	- Rise Time	268
9.1.12	- Peak Time	268
9.1.13	- Settling Time	269
9.1.14	- Steady-state Error or Offset	269
9.1.15	- Overshoot	269
9.1.16	- Time Constant	269
9.1.17	- Dead Band	270
9.1.18	- Hunting	271
9.1.19	- Failsafe	271

Contents

Chapter 9 – Terms and Definitions		
Article No.	Article	Page No.
9.1.20	- Fail-set	271
9.1.21	- Fail-proof	271
9.1.22	- Fool-proof or Poka Yoke	271
9.2	Terms Related to Valves	271
9.2.1	- Capacity	271
9.2.2	- Range and Span	271
9.2.3	- Valve Lift	272
9.2.4	- Shut-off	272
9.2.5	- Pressure Loss	272
9.2.6	- Dead Band	272
9.2.7	- Balance	272
9.2.8	- Flashing and Cavitation	272
9.3	Terms Related to Measuring Sensors	273
9.3.1	- Transducer	273
9.3.2	- Range	273
9.3.3	- Linearity	273
9.3.4	- Robustness	273
9.3.5	- Dead Band	273
9.3.6	- Drift	274
9.3.7	- Accuracy	274
9.3.8	- Precision	274
9.3.9	- Sensitivity	274
9.3.10	- Hysteresis	274
9.3.11	- Resolution	275
9.4	Graphical Symbols in Piping and Instrumentation Diagrams (P and ID)	276

Contents

Chapter 10 – Question Bank		
Article No.	Article	Page No.
10.1	Fill in the Blanks / Complete the Sentence (1 mark each)	277
10.2	Multiple Choice (1 mark each)	279
10.3	Short-answer Questions	282
10.3.1	- 2 Marks Questions	282
10.3.2	- 3- and 4-Marks Questions (Marks are in Brackets)	283
10.4	Descriptive Questions	284
10.4.1	- 5- and 6-Marks Questions (Marks are in Brackets)	284
10.4.2	- 7- and 10-Marks Questions (Marks are in Brackets)	284
10.5	Other Descriptive Questions (Marks not defined)	285
