<b>Chapter 1 – Overview of a Ship's Electrical System</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
1.1	The Marine Environment	1
1.2	Effects of Inclination	2
1.3	General Provisions	4
1.4	Installation and Basic Maintenance	9
1.5	Effects of Temperature	9
1.6	Systems and Major Components	10
1.7	Power Management Systems	22
1.8	Electrical Diagrams	28
1.9	Relevant SOLAS Regulations (Chapter II-1)	42

<b>Chapter 2 – Electrical Safety</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
2.1	Compliance with Regulations	45
2.2	The Inherent Dangers and Avoidance of Disastrous Consequences	50
2.3	Passive Safety Measures	55
2.4	Active Safety Measures	59
2.5	Fundamental Requirements for Safe Installation of Equipment	62
2.6	Dos and Don'ts While Working with Electrical Equipment	63
2.7	Danger Signals	67
2.8	Precautions for Preventing an Electric Shock	67
2.9	Conditions which Increase Danger to Personnel	69
2.10	Shock Risk with Portable AC Appliances	70
2.11	High Voltage Safety	74
2.12	Electrical Accidents	78
2.13	Maintenance of Records	85

<b>Chapter 3 – Electrical Equipment for Hazardous Areas</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
3.1	Tanker Installations	89
3.2	The International Electrotechnical Commission's Ex Scheme	95
3.3	International Safety Standards	99
3.4	Ventilation when using Varnishes, Volatile Paints etc., containing Solvents	128

# Contents

<b>Chapter 4 – AC Distribution Systems</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
4.1	The General Concept	131
4.2.	Common Systems for the Distribution of AC Power	132
4.3	Merits and Demerits of AC and DC Systems	134
4.4	Specific Systems for Ship's Service	138
4.5	Distribution Systems Onboard Ships	139
4.6	General Distribution Scheme Onboard a Ship	142
4.7	Distribution Transformers	144
4.8	Isolation Transformers	149
4.9	General Scheme Applicable to all Types of Tankers	150
4.10	Example of a High-voltage System for a Liquefied Natural Gas Carrier	152
4.11	Primary Power Bus	154
4.12	Relevant Regulations	155

<b>Chapter 5 – Emergency Power and Shore Supply</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
5.1	The Method of Supplying Emergency Power	157
5.2	The Electronic Speed Relay	171
5.3	Arrangements for Periodic Testing	172
5.4	Transitional Source of Power	173
5.5	Operating Instructions	174
5.6	Shore Supply or Cold Ironing	175
5.7	Relevant Rules	182

<b>Chapter 6 – Isolated and Earthed Neutral Systems</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
6.1	Electromagnetic Compatibility	187
6.2	Isolated and Earthed Neutral Systems	190
6.3	Grounding	193
6.4	Significance of Earth Faults	197
6.5	Multiple Systems	202
6.6	Causes of Earth Faults	202
6.7	Prevention of Earth Faults	204

# Contents

---

<b>Chapter 6 – Isolated and Earthed Neutral Systems</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
6.8	Earth Fault Monitors and Alarms	204
6.9	Basics of a Digital Earth Fault Monitor	209
6.10	Detection and Clearance of an Earth Fault	210
6.11	Relevant Rules	214

<b>Chapter 7 – Alternators</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
7.1	The Basic Concept	219
7.2	The Elementary Alternator	221
7.3	Rotor and Stator	223
7.4	Armature and Field	224
7.5	Rotating Armature Alternators	224
7.6	Rotating Field Alternators	225
7.7	The Brushless Alternator	235
7.8	The High-voltage Brushless Alternator	242
7.9	Outline of Operation of a Brushless Alternator	244
7.10	Generator Heating	245
7.11	Shaft-driven Alternators	245
7.12	Exhaust Gas Turbo-generator System	254
7.13	Advantages of Shaft Generators	256
7.14	Disadvantages of Shaft Generators	257
7.15	High Voltage Systems	258
7.16	Alternator Starting	260
7.17	Harmonics	262
7.18	Relevant Rules	266

# Contents

<b>Chapter 8 – Direct Current Generators</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
8.1	Introduction	271
8.2	Field Poles	272
8.3	Armature Windings	273
8.4	Commutator	274
8.5	Armature Reaction	276
8.6	Reduced Cross-Sectional Area of the Pole Tip	278
8.7	Compensating Windings	278
8.8	Commutating Poles	279
8.9	Commutation	280
8.10	Multi-polar Machines	282
8.11	Types of Direct Current Generators	282
8.12	Series Wound Generator	283
8.13	Shunt Wound Generator	285
8.14	Compound Wound Generators	288
8.15	Generator Control	294

<b>Chapter 9 – Automatic Voltage Regulators and Exciters</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
9.1	Performance Requirements of Alternators	301
9.2	Operating Principle of an AVR	303
9.3	Exciters and Excitation Systems	303
9.4	Thyristor-based Static Automatic Voltage Regulator	307
9.5	Alternative Thyristor-based AVR Circuits	313
9.6	Transformer-based Static Excitation System	315
9.7	Transient Voltage Dip and Alternator Response	317
9.8	Effect of kW Loading	320
9.9	Effect of kVAr Loading	322
9.10	Additional (Important) Features in a Modern AVR	323
9.11	Relevant ABS Rules	332

# Contents

<b>Chapter 10 – Fixed and Portable Instrumentation</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
10.1	The Basics	337
10.2	Measuring System Terminology	337
10.3	Some Useful Fundamentals	340
10.4	In-Circuit Meters	342
10.5	Out-of-Circuit Meters	343
10.6	Permanent Magnet Moving Coil Meter	343
10.7	Power Measurement	346
10.8	The Electrodynamicometer Wattmeter	350
10.9	Theory of an Electrodynamicometer Wattmeter	353
10.10	Shape of the Scale of an Electrodynamicometer Wattmeter	355
10.11	Power in Poly-Phase Systems - Blondel's Theorem	356
10.12	Measurement of Active Power in Three-Phase Circuits	356
10.13	Active Power Transducer	362
10.14	Power Factor Measurement	363
10.15	Frequency Meters	368
10.16	The Synchroscope	369
10.17	Instrument Transformers	375
10.18	Digital Instruments	378
10.19	Portable Measuring Instruments	383
10.20	Relevant Rules	399

<b>Chapter 11 – Paralleling of Alternators</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
11.1	The Basics	403
11.2	Manual Synchronising	406
11.3	Check-synchronising Unit	409
11.4	Automatic Synchronising	409
11.5	Synchronising with the Aid of Lamps	416
11.6	Synchronising with the Aid of a Voltmeter	419

# Contents

---

<b>Chapter 11 – Paralleling of Alternators</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
11.7	Parallel Operation	420
11.8	Excitation Control	421
11.9	Throttle Control	423
11.10	Load Sharing	426
11.11	Speed Droop and Power Generation	439

<b>Chapter 12 – Switchboards and Switchgear</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
12.1	Switchboards	451
12.2	Bus bars	460
12.3	Instrumentation and Controls	464
12.4	The Circuit Breaker (CB)	467
12.5	Circuit Breakers for Alternators	472
12.6	Moulded Case Circuit Breakers (MCCBs)	484
12.7	Miniature Circuit Breakers (MCBs)	487
12.8	Residual Current Circuit Breakers (RCCBs)	489
12.9	Arc Fault Current Interrupters	490
12.10	Fused Isolators	491
12.11	Effect of Harmonics at Receptacle Load Centres	491
12.12	Corrective and Preventive Actions in Case of a Fire in the Main Switchboard	492
12.13	Relevant Rules	493

<b>Chapter 13 – Electrical Motors</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
13.1	The 3-phase Induction Motor	497
13.2	The Synchronous Motor	500
13.3	DC Motors	509

# Contents

<b>Chapter 14 – Starters for Alternating Current Motors</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
14.1	The Contactor	533
14.2	The Direct-on-line or D.O.L. Starter	534
14.3	The Star-delta Starter	559
14.4	Starting Torque of a Squirrel-cage Type of Motor	572
14.5	Autotransformer Starter	575
14.6	Electronic Starters	578
14.7	Automatic Starting of Standby Motors	604
14.8	Speed Control of Induction Motors	607

<b>Chapter 15 – Fault Protection Devices</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
15.1	Identifying the Need for Circuit Protection	617
15.2	Direct Shorts	618
15.3	Excessive Current	621
15.4	Excessive Heat	621
15.5	Over-voltage	622
15.6	Surge	623
15.7	Transients	625
15.8	Ripple	627
15.9	Spikes	627
15.10	Overload	628
15.11	Circuit Protection	628
15.12	Alternator and Associated Systems' Protection	629
15.13	Protection Scheme on a High-voltage System (LNG Vessel)	643
15.14	Protection through Fuses	644
15.15	Protection Discrimination and Selective Coordination	667
15.16	Motor Protection	670
15.17	Cable Protection	683
15.18	Busbar Protection	684
15.19	Relevant Rules	685

# Contents

<b>Chapter 16 – Electric Cables</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
16.1	The Basics	691
16.2	Conductors	692
16.3	Temperature Coefficient	693
16.4	Current Rating and Voltage Drop	693
16.5	Cable Sizes	695
16.6	US and British Comparative Sizes for Cables and Lines	695
16.7	Cable Testing	698
16.8	Electrical Cable Codes	699
16.9	Practical Tips on Wiring	704
16.10	Cable and Wire-Marking Systems	707
16.11	Crimping Joints	709
16.12	Relevant Rules	711

<b>Chapter 17 – Insulation and Ingress Protection</b>		
<b>Article No.</b>	<b>Article</b>	<b>Page No.</b>
17.1	The Basics	715
17.2	Classes of Insulation	716
17.3	Ageing of Insulation	718
17.4	Insulating Materials generally used in a Low to Medium Power AC Motor	719
17.5	Motor Ratings versus Temperature	720
17.6	Temperature Ratings	721
17.7	Temperature Rise	721
17.8	Determination of Hot Temperature	722
17.9	Conductor Insulation	725
17.10	Insulating Materials	728
17.11	Separators and Fillers	731
17.12	Cable Sheath	731
17.13	Cable Gland	734
17.14	Plugs and Sockets for Reefer Containers	736
17.15	Degrees of Protection for an Enclosure	737
