

Table of Content

Introduction to Artificial Intelligence	1
1 Why to Study Artificial Intelligence?.....	2
1.1 Role of AI in Engineering.....	3
1.2 AI in Daily Life.....	3
1.3 Intelligence and Artificial intelligence.....	3
1.3.1 Components of Artificial Intelligence.....	5
1.3.2 Different categories of AI	6
1.3.3 Approaches to AI	6
1.4 Different task domains of AI	7
1.5 History and Early Works of AI	8
1.5.1 New Born AI.....	9
1.5.2 Era of logic in AI	9
1.5.3 AI with modern aspects	9
1.6 History of AI in nutshell	9
1.7 Programming Methods	12
1.8 Limitations of AI.....	12
Intelligent Agent	17
2 Why to study Agents?.....	18
2.1 Agent.....	18
2.1.1 Desirable properties of an Agent	18
2.1.2 Example of Agents.....	19
2.1.3 Mathematical representation of Agent.....	19
2.2 Performance evaluation	20
2.3 Task Environment of an Agent	21

x	Artificial Intelligence and Soft Computing for Beginners	
	2.3.1 Task environment properties.....	21
2.4	Agent’s classification	22
	2.4.1 Autonomous Agents.....	26
	2.4.1.1 <i>Classification of Autonomous agents</i>	26
	2.4.1.2 <i>Logical Agents and Knowledge based Agents</i>	27
2.5	Agent Architecture	27
	2.5.1 Table based architecture.....	28
	2.5.2 Logic based architecture	28
	2.5.3 Knowledge-level architecture.....	28
	2.5.4 Layered architecture	28
	Logic	31
3	Logic	32
	3.1 Logic programming	32
	3.2 Logic Representation.....	33
	3.2.1 Syntax	34
	3.2.2 Semantics	34
	3.2.3 Inference	34
	3.2.3.1 <i>Model Theory</i>	34
	3.2.3.2 <i>Proof Theory Method</i>	35
	3.2.3.3 <i>Simple Modus Ponens</i>	35
	3.2.3.4 <i>Modus Ponens with variable</i>	36
	3.2.3.5 <i>Chain rule</i>	36
	3.2.3.6 <i>Resolution (Proof by refutation)</i>	36
	3.3 Propositional Logic.....	36
	3.3.1 Connective or operator	38
	3.3.2 Truth value.....	39
	3.3.3 Tautologies.....	40

3.3.4 Contradictions	41
3.3.5 Contingencies	41
3.3.6 Antecedent and Consequent	41
3.3.7 Argument	41
3.3.8 Resolution	42
3.3.8.1 Resolution principle	42
3.3.9 Resolution strategy	43
3.3.9.1 Explanation of Resolution Tree (Unification)	45
3.3.10 Binary Resolution	46
3.3.11 Drawback of Resolution Principle	46
3.3.12 Applications of Propositional logic	46
3.3.13 Limitations of Propositional logic	47
3.4 Predicate Logic and Predicate Calculus	47
3.4.1 Syntax and Symbols	49
3.4.1.1 Constant Symbols	49
3.4.1.2 Function symbols	49
3.4.2 Semantic	50
3.4.3 Terms	50
3.5 Horn Clauses	51
3.6 Well Formed Formula (WFF)	52
3.6.1 Identifying WFFs	54
3.7 Computable functions and predicate	54
3.8 Quantifiers	55
3.8.1 Universal quantifier	55
3.8.2 Existential quantifier	56
3.8.3 Uniqueness quantifier	56
3.9 Universe of discourse	57

3.10 Applications of Predicate logic.....	57
3.10.1 Predicate calculus using Inference.....	58
3.10.2 Forward and Backward chaining.....	58
3.10.3 Basic Backward chaining procedure	59
3.11 Unification	59
3.11.1 Unification algorithm.....	59
3.11.2 A Unification Algorithm prerequisite	60
3.12 Resolution.....	66
3.12.1 Resolution strategy	66
3.13 Conjunctive Normal Form.....	66
3.13.1 Propositional Resolution.....	66
3.14 Conversion to normal form or clausal form	67

Logic Inadequacy 71

4 Fundamental Problem of Logic 72

4.1 Monotonicity with “Flying-Penguin” example	72
4.2 General disadvantage of monotonicity property in logic	73
4.2.1 Solution	73
4.3 Logic in the Search space problem:.....	73
4.4 Logic in the Decidability and Incompleteness:	74
4.5 Logic in uncertainty Modeling:	74

Fuzzy Sets And Uncertainties 77

5 Fuzzy set and fuzzy logic..... 78

5.1 Mapping of Classical Set to Fuzzy Set.....	79
5.1.1 Features of membership function	81
5.2 Set and Fuzzy Operators.....	83
5.2.1 Union	84
5.2.2 Intersection	84

5.2.2.1 <i>Complement</i>	85
5.2.2.2 <i>Power of fuzzy set</i>	85
5.2.2.3 <i>Dilation</i>	85
5.2.3 Equality of fuzzy set	85
5.2.4 Product of two fuzzy sets.....	86
5.2.5 Multiplying a fuzzy set by a crisp number	86
5.2.6 Power of fuzzy set	86
5.2.7 Concentration of the fuzzy set	86
5.3 Extended fuzzy operations (t-norms and t-conorms).....	86
5.3.1 Comparison between t-norms, t-conorms and standard fuzzy operations	86
5.4 Fuzzy Relations	90
5.4.1 Identity fuzzy relation	92
5.4.2 Universe fuzzy relation.....	92
5.4.3 Null fuzzy relation	93
5.5 Properties of Fuzzy Relations.....	93
5.5.1 Fuzzy Cartesian product	93
5.5.2 Fuzzy Composition.....	94
5.6 Fuzzy System and Design.....	97
5.6.1 Approximate reasoning and Fuzzy Implication	98
5.7 Linguistic Hedges	98
5.8 Syntax for IF and THEN rules or fuzzy rule-based system.....	101
5.9 Types of fuzzy rule-based system.....	101
5.9.1 Multiple conjunctive antecedents	101
5.9.2 Multiple disjunctive antecedents	102
5.9.3 Aggregation of fuzzy rules.....	102
5.9.3.1 <i>Conjunctive system of rules</i>	102
5.9.3.2 <i>Disjunctive system of rules</i>	102

5.10 Fuzzy linguistic controller	103
5.11 Fuzzy Inference.....	104
5.11.1 Rules of Inference	106
5.12 Graphical Techniques of Inference	107
5.12.1 Mamdani Assilian or Mamdani systems.....	107
5.12.2 Sugeno method	109
5.12.3 Tskamoto inference method.....	111
5.13 How Fuzzy Logic is used	112
5.14 Fuzzification	112
5.15 Defuzzification.....	113
5.15.1 Defuzzification to crisp set	113
5.15.2 λ -cuts for fuzzy relations	115
5.15.3 Defuzzification Methods.....	116
5.15.3.1 Center Of Gravity (COG) Defuzzification.....	116
5.15.3.2 Mean Of Maximum (MOM) Defuzzification	117
5.15.3.3 Max membership principle.....	118
5.15.3.4 Centroid method	118
5.15.3.5 Weighted average method	119
5.15.3.6 Mean max membership	120
5.15.3.7 Center of sums.....	120
5.15.3.8 Center of largest area.....	121
5.15.3.9 First (or last) of maxima	122
5.15.4 Comparison between different defuzzification methods	123
5.16 Unique features of fuzzy logic.....	124
5.17 Application of Fuzzy logic.....	125
5.17.1 Home appliances.....	125
5.17.2 Medical Diagnostic system.....	126

5.17.3 Weather forecasting	126
5.18 Fuzzy logic, uncertainty and probability	127
5.19 Advantages of fuzzy logic and fuzzy systems	127
5.20 Limitations of fuzzy logic and fuzzy systems	128
Knowledge Representation with Networked Schemes	129
6 Knowledge Representation	130
6.1 Why we need Knowledge?	131
6.2 Need to represent knowledge.....	132
6.3 Knowledge representation with mapping scheme	132
6.4 Properties of a good knowledge base system	134
6.4.1 Representational Adequacy	134
6.4.2 Inferential Adequacy.....	135
6.4.3 Inferential Efficiency	135
6.4.4 Acquisitional Efficiency.....	135
6.5 Knowledge representation issues.....	135
6.6 AND-OR Graphs	139
6.6.1 Problem decomposition using AND-OR graphs.....	140
6.7 Types of Knowledge	143
6.7.1 Relational Knowledge	143
6.7.2 Inheritable knowledge	144
6.7.3 Inferential knowledge	144
6.7.4 Declarative knowledge	145
6.7.5 Procedural knowledge	145
6.8 Knowledge representation schemes.....	146
6.8.1 Semantic net or Associative nets	146
6.8.1.1 Structure of Semantic net	147
6.8.1.2 Advantage of semantic net	148

- 6.8.1.3 *Disadvantages of semantic net*..... 148
- 6.8.1.4 *Extended semantic nets or partitioned semantic net*..... 149
- 6.8.2 Frames 149
 - 6.8.2.1 *Structure of frames* 149
 - 6.8.2.2 *Advantages of using frame structure*..... 150
- 6.8.3 Conceptual Graphs..... 150
 - 6.8.3.1 *Some conventions used in Conceptual Graph representation*..... 151
 - 6.8.3.2 *Simplification using Conceptual Graphs* 151
- 6.8.4 Conceptual dependency theory..... 152
 - 6.8.4.1 *Conceptual Syntax Rule* 153
 - 6.8.4.2 *Rules of conceptual dependencies*..... 154
 - 6.8.4.3 *Conceptual representation and SCRIPT*..... 156
 - 6.8.4.4 *Advantage of conceptual dependency* 158
 - 6.8.4.5 *Disadvantage of conceptual dependency*..... 158
- 6.8.5 What is SCRIPT 158
 - 6.8.5.1 *Advantage and disadvantages of SCRIPTS*..... 162
- 6.8.6 Weak Slot filler and Strong slot filler..... 162

Reasoning and Knowledge Representation 165

- 7 Reasoning 166**
 - 7.1 Types of reasoning..... 167
 - 7.1.1 Non-monotonic Reasoning 167
 - 7.1.2 Monotonic Reasoning..... 167
 - 7.1.3 Default Reasoning 168
 - 7.1.4 Minimalist Reasoning..... 168
 - 7.2 Methods of Reasoning 170
 - 7.3 Application of reasoning..... 171
 - 7.4 Forward and Backward reasoning 171

7.5 Augmenting problem solver	173
7.5.1 Dependency directed backtracking.....	173
7.5.1.1 Truth Maintenance System (TMS).....	174
7.5.1.2 Capability to afford justifications for conclusions	175
7.5.1.3 Ability to distinguish inconsistencies	175
7.5.1.4 Support default reasoning.....	175
7.5.1.5 Support dependency driven backtracking.....	175
7.5.1.6 Application of TMS system.....	176
7.5.2 Justification based Truth Maintenance System (JTMS)	176
7.5.2.1 JTMS operations	178
7.5.2.2 Special states of JTMS nodes	179
7.5.2.3 Advantages of JTMS	180
7.5.3 Logic Based Truth Maintenance system(LTMS).....	180

Uncertainties and Inconsistencies with Probabilistic Reasoning .181

8 Uncertainty in artificial intelligence	182
8.1 Origin of uncertainty in artificial intelligence	182
8.2 Probabilistic Reasoning	183
8.2.1 Application of probabilistic reasoning.....	184
8.2.2 Reasoning under uncertainty	184
8.2.3 Probability and probability Calculus	185
8.2.4 Bayes' Theorem and Bayesian probabilistic inference.....	186
8.2.4.1 Bayes' Rule and application of Bayes' Rule.....	187
8.2.4.2 Application of Bayes' Rule	187
8.2.4.3 Disadvantage of Bayesian probabilistic inference.....	188
8.3 Dempster-Shafer Theory.....	189
8.3.1 Advantage of Dempster-Shafer Theory	194
8.3.2 Disadvantage of Dempster-Shafer Theory.....	194

8.4 Bayesian Networks (BNs)	195
8.4.1 Structure of Bayesian Networks	196
8.4.1.1 Nodes and value analysis	197
8.4.1.2 Structure analysis	197
8.4.1.3 The Markov property analysis	198
8.4.1.4 Representing joint probability distribution	198
8.4.2 Reasoning with Bayesian Networks	200
8.4.3 Application of Bayesian Networks	202
8.4.4 Disadvantages of Bayesian Networks	203

Search Techniques 205

9 Search Techniques	206
9.1 What is search?	207
9.2 Representation techniques	207
9.3 Categories of search	208
9.3.1 State Space search	208
9.3.1.1 Strategies for exploration of problem space	208
9.3.2 Data –driven search strategy	210
9.3.3 Goal-driven search strategy	210
9.4 Disadvantage of state space search	210
9.5 Issues in the design of search programs	210
9.5.1 Forward and Backward Reasoning	211
9.5.2 Matching	211
9.5.3 Node Representation	211
9.6 General Search Examples	211
9.6.1 Tic-Tac-Toe problem	211
9.6.1.1 State Representation and Initial State	213
9.6.1.2 Operators	213

9.6.1.3 State-space graph for Water-jugs-problem	214
9.6.2 8-puzzle problem	214
9.7 Classification of search diagram representation	216
9.7.1 Uninformed Search or Blind search	216
9.7.2 Uniform-cost search.....	217
9.7.3 Bidirectional search	217
9.7.4 Informed Search.....	218
9.7.5 Heuristic Method and Heuristic Search.....	218
9.7.5.1 Properties of Heuristic Search.....	218
9.7.5.1.1 Admissibility	219
9.7.5.1.2 Monotonicity or consistency.....	219
9.7.5.1.3 Informedness.....	219
9.7.5.1.4 Completeness.....	220
9.7.5.1.5 Dominance.....	220
9.7.5.1.6 Optimality.....	220
9.7.5.2 Heuristic functions	220
9.7.5.3 Heuristics in 8-puzzle problem and Tic-tac toe problem	220
9.8 Hill Climbing Method and Hill Climbing search	222
9.8.1 Hill climbing search algorithm	223
9.8.2 Hill climbing with 8 puzzle example.....	224
9.8.3 Disadvantage of Hill Climbing Method	226
9.8.3.1 Foothill Trap	226
9.8.3.2 Plateau problem.....	227
9.8.3.3 Ridge problem	227
9.8.4 Computational complexity of hill climbing method.....	227
9.9 Simulated Annealing.....	228
9.9.1 Simulated annealing algorithm.....	229

9.10 Best-First search 229

 9.10.1 BEST-FIRST search example 231

 9.10.2 Performance of Best First Search 232

 9.10.3 Disadvantage 233

9.11 Branch-and-Bound search 233

9.12 A* search 234

 9.12.1 Properties of A* search 238

 9.12.2 Completeness and Optimality of A* 239

Adversarial Search (Game Trees or Game Playing) 245

10 Game Trees or Game Playing 246

10.1 Two player games 246

10.2 Minmax Search 247

 10.2.1 Minmax Procedure 247

 10.2.2 Heuristic Minmax 247

 10.2.3 Example of Minmax Procedure 247

 10.2.3.1 *The Game of Nim* 247

 10.2.3.2 *What is NIM?* 248

 10.2.3.3 *Computing successor for NIM* 248

 10.2.3.4 *Minmax with tic tac toe game* 250

10.3 Complexity of Min max algorithm 253

10.4 Alpha-Beta pruning 254

 10.4.1 Rules for Alpha-beta Pruning 255

 10.4.2 Alpha-Beta Concept 255

 10.4.3 Search graph of Alpha-Beta Concept 256

 10.4.4 Alpha-Beta pruning algorithm 257

 10.5.5 alpha –beta cut-off on tic tac toe game 259

 10.5.6 Effectiveness of Alpha-Beta Search 260

10.5 Search versus Games	261
--------------------------------	-----

Planning 263

11 Planning..... 264

11.1 Necessity of planning.....	264
---------------------------------	-----

11.2 Components of Planning.....	265
----------------------------------	-----

11.3 Planning Agents	268
----------------------------	-----

11.4 Planning –generating schemes	268
---	-----

11.4.1 Forward State Space Planning and Backward State Space Planning	269
---	-----

11.4.2 Goal stack Planning	271
----------------------------------	-----

11.4.3 Script-based planning	274
------------------------------------	-----

11.4.4 Opportunistic planning	274
-------------------------------------	-----

11.5 Algorithm for planning	274
-----------------------------------	-----

11.6 Planning Representation with STRIPS an example.....	275
--	-----

11.7 Planning Example –“The blocks world”.....	276
--	-----

11.8 Difficulties with planning	278
---------------------------------------	-----

Advancement of Artificial Intelligence Expert System Production System & Neural Networks 279

12 Advancement of Artificial Intelligence 280

12.1 EXPERT SYSTEM.....	280
-------------------------	-----

12.2 Expert System structure.....	281
-----------------------------------	-----

12.3 Knowledge acquisition	282
----------------------------------	-----

12.4 Knowledge representation	283
-------------------------------------	-----

12.5 Inference control mechanism.....	284
---------------------------------------	-----

12.6 User interface.....	284
--------------------------	-----

12.7 Expert System Shell.....	285
-------------------------------	-----

12.8 Knowledge Representation.....	286
------------------------------------	-----

12.9 Inference Mechanism.....	286
-------------------------------	-----

12.10 Developer Interface and User Interface	287
12.11 Characteristics of Expert system.....	287
12.11.1 Understandable	288
12.11.2 High performance	288
12.11.3 Flexibility.....	288
12.12 Advantages of an Expert system.....	288
12.12.1 Permanence.....	288
12.12.2 Reliability	288
12.12.3 Availability.....	289
12.13 Production System.....	289
12.13.1 Components of production system	289
12.13.2 How Production System Works.....	290
12.13.3 Advantage of using rule-based production system	291
12.13.4 Disadvantage of using rule-based production system	292
12.14 Artificial Neural Networks (ANN)	292
12.14.1 Characteristics of Neural Networks.....	293
12.14.2 Architecture of neural networks.....	294
12.14.2.1 <i>Feed forward or back propagation model</i>	294
12.14.2.2 <i>Recurrent network</i>	294
12.14.2.3 <i>Learning or Training methods and ANN</i>	294
12.14.2.4 <i>Supervised learning</i>	295
12.14.2.5 <i>Unsupervised learning</i>	295
12.14.2.6 <i>Reinforced learning</i>	296
12.14.3 Types of neural networks.....	296
12.14.3.1 <i>Multilayer perception (MLP)</i>	296
12.14.3.2 <i>Radial basis function networks (RBF)</i>	297
12.14.3.3 <i>Kohonen Self organizing feature maps (SOFM)</i>	298

12.14.4 Application of neural networks.....	298
---	-----

Natural Language Processing 301

13 Natural Language Processing..... 302

13.1 Need for Natural Language Processing.....	302
13.2 Natural Language Understanding.....	304
13.2.1 Syntax.....	305
13.2.2 Semantics.....	305
13.2.3 Pragmatics.....	306
13.2.4 Phonological Analysis.....	307
13.2.5 Morphological Analysis.....	307
13.2.6 Syntactic Analysis.....	309
13.2.6.1 Grammar.....	309
13.2.6.1.1 Grammar structure.....	310
13.2.6.1.2 Context Free Grammar.....	311
13.2.6.1.3 Case grammar.....	312
13.2.6.1.4 Semantic grammars.....	313
13.2.6.1.5 Parsing.....	313
13.2.6.1.6 Types of parsing.....	315
13.2.6.1.7 Basic Parsing Techniques.....	317
13.2.7 Semantic Analysis.....	320
13.2.8 Pragmatic Analysis.....	320
13.2.9 World.....	320
13.3 Natural Language Generation.....	321
13.3.1 Utterance Planning.....	321
13.3.2 Sentence Planning.....	322
13.3.3 Sentence Generation.....	322
13.3.4 Morphology.....	322

13.4 Applications of Natural Language Processing 322

Constraint Satisfaction Problem 323

14 Constraint Satisfaction Problem (CSP)..... 324

14.1 Constraint satisfaction problem 324

14.2 Constraints and Satisfiability 325

14.3 Basic search strategies for solving CSP..... 325

14.3.1 Generate and test..... 326

14.3.2 Backtracking 327

14.3.2.1 Limitation of backtracking method 327

14.3.3 Consistence driven techniques..... 327

14.3.4 Forward checking 328

14.4 Representation of CSP problem..... 328

14.5 Examples of constraint satisfaction problem 328

14.5.1 Scheduling Problem..... 329

14.5.2 N-Queens problem 329

14.5.3 Map-Colouring problem 330

14.5.4 Satisfiability (SAT) problem..... 331

14.6 Local search for constraint satisfaction problem 332

Single Objective & Multi Objective Genetic Algorithms 335

15 Understanding Genetic Algorithms 336

15.1 Why Genetic algorithm? 337

15.2 Evolutionary Algorithm steps 338

15.3 Genetic Algorithm as Evolutionary process 339

15.4 Types of Genetic Algorithm..... 341

15.4.1 Single-objective Genetic Algorithm (SGA)..... 341

15.4.2 Multi-objective Genetic Algorithms 343

15.5 Single objective Genetic Algorithm operators..... 344

15.5.1 Encoding	344
15.5.1.1 Principle of meaningful building blocks	345
15.5.1.2 Principle of minimal alphabets	345
15.5.1.3 Binary Encoding.....	345
15.5.1.4 Value Encoding.....	347
15.5.1.5 Permutation Encoding	347
15.5.1.6 Tree Encoding.....	348
15.5.2 Selection Operator	349
15.5.2.1 Roulette wheel selection.....	350
15.5.2.2 Proportional Roulette Wheel Selection	353
15.5.2.2.1 Disadvantage of proportional Roulette Wheel Selection.....	354
15.5.2.3 Rank-Based Roulette Wheel Selection	354
15.5.2.3.1 Advantage and disadvantage of Rank based selection	355
15.5.3 Tournament selection.....	356
15.5.3.1 Advantage and disadvantage of Tournament selection.....	358
15.5.4 Steady state selection.....	358
15.5.5 Stochastic remainder selection	358
15.6 Elitism.....	359
15.7 Crossover	359
15.7.1 Single Point Crossover	360
15.7.2 Multi Point Crossover.....	361
15.7.3 Uniform Crossover	361
15.7.4 Adapted Genetic Crossover Operator.....	362
15.7.4.1 Cycle Crossover	362
15.7.4.2 Partially-Mapped Crossover (PMX)	364
15.7.4.3 Ordered Crossover (OX)	366
15.7.4.4 Order-based crossover.....	368

15.7.5 Other crossover methods	369
15.7.5.1 Crossover with reduced surrogate	369
15.7.5.2 Shuffle crossover	369
15.8 Mutation.....	372
15.8.1 Single Point Mutation.....	372
15.8.2 Multi Point Mutation	373
15.8.3 Reverse Sequence Mutation (RSM).	374
15.8.4 Importance of mutation.....	374
15.9 Some important genetic algorithm parameters.....	375
15.9.1 Population Size	376
15.9.2 Cross over rate	376
15.9.3 What is mutation rate?	376
15.10 Genetic algorithms designing issues.....	376
15.11 Modified Procedure of Genetic Algorithm	377
15.12 Genetic Programming.....	384
15.13 Multi-objective Genetic Algorithm.....	389
15.13.1 Fitness function.....	395
15.13.2 Diversity	395
15.13.3 Elitism.....	396
15.14 NSGA and NSGA-II Algorithm.....	396
15.14.1 NSGA-II	397
15.14.1.1 Population Initialization	397
15.14.1.2 Non-Dominated Sort	397
15.14.1.3 Density Estimation	398
15.14.2 NSGA-II Algorithm	398
15.14.2.1 Need of SPEA2.....	402
15.14.2.2 SPEA2	402

15.15 NSGA II and SPEA 2.....	403
15.16 Application.....	405
15.17 Advantages of Genetic Algorithms.....	408
15.18 Disadvantage of Genetic Algorithms.....	409
Artificial Neural Networks	413
16 Need for neural networks	414
16.1 Fundamentals of Neural Networks	414
16.2 Different tasks performed by neural network.....	416
16.2.1 Optimization	416
16.2.2 Pattern classification	416
16.2.3 Clustering.....	416
16.2.3.1 IRIS Dataset	417
16.2.3.2 Kalazar Dataset	418
16.2.3.3 Breast Cancer Dataset	418
16.3 Components of Artificial Neural Network.....	418
16.3.1 Weighting Factor.....	420
16.3.2 Summation Function	420
16.3.3 Transfer Function.....	421
16.3.4 Scaling and Limiting components	422
16.3.5 Output Function	422
16.3.6 Error function and Back-Propagated value.....	422
16.3.7 Learning Function.....	422
16.4 Teach an Artificial Neural Network.....	423
16.4.1 Learning Laws	423
16.4.1.1 Hebb's Rule	423
16.4.1.2 Hopfield Law.....	424
16.4.1.3 The Delta Rule.....	424

16.4.1.4	<i>The Gradient Descent Rule</i>	424
16.4.1.5	<i>Kohonen's Learning Law</i>	425
16.4.1.6	<i>Error-correction rules</i>	425
16.4.1.7	<i>Boltzmann learning</i>	427
16.4.1.8	<i>Competitive Learning Rule</i>	427
16.5	Different Neural Network Models	428
16.6	Feedforward Neural network	430
16.6.1	Single layer Feed forward Networks	431
16.6.1.1	<i>Architecture</i>	431
16.6.2	Multilayer Feed forward Networks	432
16.6.2.1	<i>Architecture</i>	433
16.6.2.2	<i>Back Propagation Training Algorithm</i>	434
16.6.2.2.1	<i>Solve bakpropagation problem</i>	435
16.6.2.2.2	<i>Application of the algorithm</i>	440
16.6.2.2.3	<i>Difficulties with bakpropagation</i>	442
16.6.2.3	<i>Radial Basis Function Network</i>	442
16.6.2.3.1	<i>Input Layer</i>	442
16.6.2.3.2	<i>Hidden Layer</i>	442
16.6.2.3.3	<i>Summation Layer</i>	443
16.6.3.4	<i>Training RBF network</i>	443
16.7	Feedback/Recurrent Networks	444
16.7.1	Kohonen's Self Organizing Maps	444
16.7.1.1	<i>Self-amplification</i>	444
16.7.1.2	<i>Competition</i>	444
16.7.1.3	<i>Cooperation</i>	444
16.7.1.4	<i>Structural information</i>	445
16.7.1.5	<i>Architecture</i>	445

16.7.1.6 <i>Self Organization Process</i>	446
16.7.1.7 <i>Application</i>	448
16.7.2 Adaptive Resonance Theory Models	448
16.7.2.1 <i>Architecture of ART1</i>	449
16.7.2.2 <i>ART1 learning algorithm</i>	450
16.7.3 Hopfield Network	450
16.7.3.1 <i>Working of Hopfield network</i>	452
16.7.3.2 <i>How to set weight matrix?</i>	452
16.8 Special cases in designing ANN	454
16.9 Neural Fuzzy System	454
16.9.1 Characteristics of Neural Fuzzy System	455
16.9.2 Types of Neural Fuzzy System	456
16.9.2.1 <i>Cooperative Fuzzy Neural Network</i>	456
16.9.2.2 <i>Concurrent Neuro-Fuzzy System</i>	456
16.9.2.3 <i>Hybrid Fuzzy Neural Network</i>	457
16.9.3 Advantages of Neural Fuzzy System	457

Other Soft computing techniques, Pattern Recognition & Data Clustering461

17 Tabu search	462
17.1 What is Tabu search	463
17.2 Basics principle of Tabu search	464
17.3 Tabu search methodology	465
17.4 Descent method and Tabu search.....	467
17.5 Properties of Tabu search	468
17.6 Application.....	469
17.7 Ant colony optimization (ACO)	470
17.7.1 Advantages.....	473

17.8 Particle Swarm Optimization (PSO).....	473
17.8.1 The PSO algorithm	473
17.9 Comparisons between PSO and other techniques	476
17.10 Artificial neural network and PSO.....	476
17.11 Pattern recognition and neural network	477
17.11.1 Need for pattern recognition	477
17.11.2 Pattern recognition	478
17.11.3 Issues in Pattern recognition	480
17.11.4 Components of Pattern recognition/Pattern recognition system.....	481
17.11.4.1 <i>Data acquisition</i>	481
17.11.4.2 <i>Preprocessing</i>	482
17.11.4.3 <i>Feature Extraction</i>	482
17.11.5 Basic Pattern recognition approaches	483
17.11.5.1 <i>Template matching</i>	484
17.11.5.2 <i>Statistical Pattern recognition</i>	484
17.11.5.3 <i>Syntactic approach</i>	486
17.11.5.4 <i>Neural Pattern recognition</i>	486
17.11.6 Application of pattern recognition	488
17.12 Another soft computing technique	488
17.12.1 Clustering	488
17.12.1.1 <i>Clustering Types</i>	489
17.12.1.2 <i>Partitional clustering</i>	489
17.12.1.3 <i>Hierarchical clustering</i>	489
17.12.1.4 <i>Density-based clustering</i>	490
17.12.1.5 <i>Grid-based clustering</i>	490
17.12.2 Cluster Algorithms.....	490
17.12.2.1 <i>K-means clustering algorithm</i>	490

17.12.2.2 Drawbacks of K-Means Clustering.....	492
17.12.3 Fuzzy C-means clustering.....	492
17.12.3.1 Fuzzy C-means Algorithm.....	493
17.12.3.2 Advantage of Fuzzy C-Means	495
17.12.4 Validity Indices on Clustering.....	496
17.12.4.1 Dunn's Index	496
17.12.4.2 Davies-Bouldin index.....	496
17.13 Clustering with Genetic Algorithm.....	497
Prolog	501
18 Introduction	502
18.1 Prolog programming features	502
18.1.1 Facts 502	
18.1.1.1 Syntax of fact.....	502
18.1.2 Rules 503	
18.1.2.1 Syntax of Rule.....	504
18.2 PROLOG Syntax	505
18.2.1 Terms 505	
18.2.1.1 Atoms.....	505
18.2.1.2 Numbers	505
18.2.1.3 Variables.....	505
18.2.1.4 Compound terms	505
18.3 Clauses Programs and queries	505
18.4 Built-in Predicates	506
18.5 Type checking of Prolog terms and Help function	507
18.6 Query Answering.....	507
18.6.1 Matching.....	507
18.6.2 Goal Execution	508

18.7 List Manipulation	509
18.7.1 Head and Tail of a list	510
18.7.2 Built-in Predicates in List	511
18.8 Arithmetic Expression in Prolog.....	513
18.8.1 Predefined arithmetic function and relation.....	513
<i>18.8.1.1 Functions</i>	<i>513</i>
