# Table of Contents

<b>Preface.....</b>	<b>ix</b>
<b>1. Introduction.....</b>	<b>1</b>
How the Cluster Operates	2
Adjust, Secure, and Tune the Cluster	3
Responding When Things Go Wrong	3
Extending the System with New and Custom Functionality	4
Summary	5
<b>2. An Overview of Kubernetes.....</b>	<b>7</b>
Containers	7
Container Orchestration	9
The Kubernetes API	10
Basic Objects: Pods, ReplicaSets, and Services	10
Organizing Your Cluster with Namespaces, Labels, and Annotations	14
Advanced Concepts: Deployments, Ingress, and StatefulSets	15
Batch Workloads: Job and ScheduledJob	18
Cluster Agents and Utilities: DaemonSets	18
Summary	18
<b>3. Kubernetes Architecture.....</b>	<b>21</b>
Concepts	21
Declarative Configuration	21
Reconciliation or Controllers	22
Implicit or Dynamic Grouping	23
Structure	25
Unix Philosophy of Many Components	25
API-Driven Interactions	25

Components	26
Head Node Components	26
Components On All Nodes	28
Scheduled Components	29
Summary	30
<b>4. The Kubernetes API Server.....</b>	<b>31</b>
Basic Characteristics for Manageability	31
Pieces of the API Server	31
API Management	32
API Paths	32
API Discovery	33
OpenAPI Spec Serving	36
API Translation	37
Request Management	38
Types of Requests	38
Life of a Request	39
API Server Internals	46
CRD Control Loop	46
Debugging the API Server	46
Basic Logs	47
Audit Logs	47
Activating Additional Logs	47
Debugging kubectl Requests	48
Summary	48
<b>5. Scheduler.....</b>	<b>49</b>
An Overview of Scheduling	49
Scheduling Process	50
Predicates	50
Priorities	50
High-Level Algorithm	51
Conflicts	52
Controlling Scheduling with Labels, Affinity, Taints, and Tolerations	53
Node Selectors	53
Node Affinity	54
Taints and Tolerations	56
Summary	57
<b>6. Installing Kubernetes.....</b>	<b>59</b>
kubeadm	59
Requirements	60

kubeadm	61
Installing the Control Plane	62
kubeadm Configuration	63
Preflight Checks	64
Certificates	65
etcd	65
kubeconfig	67
Taints	68
Installing Worker Nodes	68
Add-Ons	69
Phases	70
High Availability	70
Upgrades	71
Summary	73
<b>7. Authentication and User Management.....</b>	<b>75</b>
Users	76
Authentication	77
kubeconfig	85
Service Accounts	87
Summary	89
<b>8. Authorization.....</b>	<b>91</b>
REST	91
Authorization	92
Role-Based Access Control	93
Role and ClusterRole	94
RoleBinding and ClusterRoleBinding	96
Testing Authorization	98
Summary	99
<b>9. Admission Control.....</b>	<b>101</b>
Configuration	102
Common Controllers	102
PodSecurityPolicies	102
ResourceQuota	104
LimitRange	106
Dynamic Admission Controllers	107
Validating Admission Controllers	108
Mutating Admission Controllers	110
Summary	113

<b>10. Networking.....</b>	<b>115</b>
Container Network Interface	115
Choosing a Plug-in	117
kube-proxy	117
Service Discovery	119
DNS	119
Environment Variables	120
Network Policy	121
Service Mesh	123
Summary	124
<b>11. Monitoring Kubernetes.....</b>	<b>127</b>
Goals for Monitoring	127
Differences Between Logging and Monitoring	129
Building a Monitoring Stack	129
Getting Data from Your Cluster and Applications	129
Aggregating Metrics and Logs from Multiple Sources	131
Storing Data for Retrieval and Querying	133
Visualizing and Interacting with Your Data	134
What to Monitor?	134
Monitoring Machines	135
Monitoring Kubernetes	136
Monitoring Applications	136
Blackbox Monitoring	137
Streaming Logs	138
Alerting	138
Summary	139
<b>12. Disaster Recovery.....</b>	<b>141</b>
High Availability	141
State	142
Application Data	142
Persistent Volumes	143
Local Data	143
Worker Nodes	143
etcd	144
Ark	145
Summary	146
<b>13. Extending Kubernetes.....</b>	<b>149</b>
Kubernetes Extension Points	149
Cluster Daemons	150

Use Cases for Cluster Daemons	150
Installing a Cluster Daemon	151
Operational Considerations for Cluster Daemons	151
Hands-On: Example of Creating a Cluster Daemon	152
Cluster Assistants	152
Use Cases for Cluster Assistants	153
Installing a Cluster Assistant	153
Operational Considerations for Cluster Assistants	154
Hands-On: Example of Cluster Assistants	154
Extending the Life Cycle of the API Server	155
Use Cases for Extending the API Life Cycle	155
Installing API Life Cycle Extensions	156
Operational Considerations for Life Cycle Extensions	156
Hands-On: Example of Life Cycle Extensions	156
Adding Custom APIs to Kubernetes	158
Use Cases for Adding New APIs	158
Custom Resource Definitions and Aggregated API Servers	159
Architecture for Custom Resource Definitions	160
Installing Custom Resource Definitions	160
Operational Considerations for Custom Resources	161
Summary	161
<b>14. Conclusions.....</b>	<b>163</b>
<b>Index.....</b>	<b>165</b>
